IT SALARY SURVEY

2018

ATLANTA

The MATRIX-PayScale IT Salary Survey for the Atlanta market is a reflection of the typical percentile range (25th, 50th, and 75th) for 20 of the most common IT positions, based on the statistical median of compensation packages for similar profiles in Atlanta. MATRIX partners with PayScale for this survey that captures the typical total cash compensation for an individual's job based on location, experience, education, certifications, and other factors. PayScale algorithms analyze up to 100 comparable data points of individuals with similar attributes to create each profile.

Compensation reflects senior level positions (at least 5+ years experience).
